

# mesa·az Transportation Advisory Board Report

**Date:** August 18, 2009  
**To:** Transportation Advisory Board  
**Through:** Fred Rustam, Deputy Engineer – Design  
**From:** Christopher Scott, Senior Civil Engineer  
**Subject:** Power Road Improvements, Pecos Rd to Loop 202 (Santan) Freeway  
City Project No. 04-843-001  
Council District 6

## Purpose

The purpose of this report is to provide an update to the Board on the alignment study for the Power Road Improvements from Pecos Road to the Loop 202 (Santan) Freeway.

## Background

At the July 21, 2009 Board meeting, the owner of multiple parcels of land at the northwest corner of Power Road and Williams Field Road requested that the Board table the vote on the preferred alignment until the August meeting. The Board granted the request and recommended that staff meet with the property owners to discuss the preferred alignment and try to resolve their concerns if possible.

## Update

On July 28, 2009, staff met with the property owner and their attorney. Discussions are ongoing and staff is preparing more detailed exhibits and estimates, which will be presented to the TAB at the September Board meeting.
