ELECTRIC UTILITY

Rates for electric service are comprised of three major components: System Service Charge with a flat monthly rate, Energy Usage Charge based on units of consumption, and the Electric Energy Cost Adjustment Factor (EECAF) which passes the cost of the purchase of the electric commodity to the customer.

Residential Rates

Increase Residential System Service Charge $0.25, from $11.75 to $12.00, 2.1%
Create voluntary green tariff with additional $0.01/kWh usage charge

Non-Residential Rates

System Service Charge – summer: increase $1.00
System Service Charge – winter: increase $1.00
