ELECTRIC UTILITY – Approved Rate Changes for January 1, 2021

Rates for electric service are comprised of three major components: System Service Charge with a flat monthly rate, Energy Usage Charge based on units of consumption, and the Electric Energy Cost Adjustment Factor (EECAF) which passes the cost of the purchase of the electric commodity to the customer.

**Residential Rates**

System Service Charge: increase $1.00

Usage Charge – Summer Tier 1: increase 1%

Usage Charge – Winter Tiers 1 and 2: increase 5%

**Non-Residential Rates**

Create new Electric Standby Rate for non-residential customers that generate on-site energy
