INVITING WILDLIFE TO YOUR OWN BACKYARD
Create a wildlife-friendly landscape to help restore lost habitat

You hear about Monarch butterfly populations being on the decline and bees disappearing due to colony collapse disorder. Even many of our songbirds are experiencing downward trends in population. Is there anything you can do to help? Fortunately, yes! Pollinators and birds worldwide are in decline due to habitat loss, invasive species, parasites, and pesticides. Whether you have an apartment patio, a residential yard, a school garden, golf course, or common area, you can create a wildlife-friendly garden or landscape that helps restore habitat.

**BASICS**
Provide food such as native plants and flowers, shallow water sources, protective cover such as trees and shrubs, and a place for wildlife to raise their young. For butterflies, as an example, this would mean specific plants, such as milkweed for caterpillars to feed upon and nectar plants for adults.

**LEARN WILDLIFE NEEDS**
Many local organizations (see below) provide assistance. Also, watch for plant sales at Desert Botanical Garden and Boyce Thompson Arboretum. Glendale offers a great booklet, *Welcome Wildlife to Your Garden*.

**EASE UP ON CLEANUP**
Allow plants to grow naturally to help create nesting places. Leave flowers to dry so birds can find the seeds. Leave a little litter. It is good for your plants and for insect-eating birds. Reduce or eliminate pesticide use and welcome beneficial bugs.

**GET CERTIFIED**
The National Wildlife Federation certifies Backyard Wildlife Habitats. Find this and other certifications below:

**EVENTS & CERTIFICATION PROGRAMS**

**EVENT:** Wed. March 3, 12-1 p.m. *Milkweeds for Monarchs*. Gail Morris, Coordinator of the SW Monarch Study, will discuss how to attract Monarchs and other butterflies to your garden. Mesa staff will provide a brief photo tour of the new Monarch Garden & Reading Sanctuary. Presented online via Facebook Live.

**MONARCH WAYSTATION:** *SW Monarch Study* has great information, including how to create waystations (a place for Monarchs to rest and feed during migration).

**NATIONAL WILDLIFE FEDERATION:** How to create a wildlife-friendly garden and how to get certified.

**AUDUBON SOCIETY:**
- *Nina Mason Pulliam Rio Salado Audubon Center*: location & programs (currently closed due to COVID).
- *Desert Rivers Audubon*: Offers education programs and Bird Habitat recognition.

**MILLION POLLINATOR GARDEN CHALLENGE:** Register gardens that support pollinators.

**START SAVING**
Start saving on your water bill while doing your part to support wildlife and for building a sustainable community. Visit our [website](#) for more sustainability savings tips.
